

Shubham Shewale

Software Test Engineer

MOB: +917900044753

Email: shewaleshubham94@gmail.com

Pune: Pune

Professional Summary

Detail-oriented **Software Test Engineer** with **4 years** of experience in **Automation, database, and API testing** within the **Banking domain**. Skilled in designing, maintaining, and optimizing automation frameworks using **Playwright, Selenium WebDriver, Rest Assured and BDD Cucumber**, ensuring scalable and robust testing solutions. Proficient in leveraging **GitHub Copilot** to accelerate framework development, streamline test case creation, and enhance code quality. I am committed to improving testing processes and ensuring software quality through meticulous data validation and effective communication.

Skills

- Automation Testing
- Batch testing
- GitHub Copilot
- AI-assisted test automation
- API testing
- Agile Methodologies
- Strategic Planning
- Defect Tracking
- Requirement Gathering
- Test Case designing
- Drafting TSR, Test Plan
- Prompt Engineering
- Active Listening

Technical Skills

- Testing Tools : **Playwright, Selenium, Rest Assured**
- Languages : **JAVA, SQL, JavaScript Basics**
- IDE : **Eclipse, Visual Studio Code**
- Test Framework : **TestNG, BDD Cucumber**
- API Testing Tools : **Postman, Soap UI**
- Build Tool : **Maven**
- Methodologies : **Agile - Scrum**
- Bug Tracking Tools: **JIRA, Confluence**
- CI/CD : **Github Actions**
- Version Control : **GIT**
- Databases : **MySQL**
- Operating Systems : **Windows (8,10, 11)**

Work experience

Infosys Limited

Software Test Engineer

Sep22–Till Date

Roles and Responsibilities

- Collaborated with the development team, product management, business analysts, and other stakeholders** in an Agile-Scrum environment to clarify requirements and ensure the timely delivery of high-quality software.
- Actively participated in **100+ Agile ceremonies**, including **sprint grooming, sprint planning, daily stand-ups**, and **sprint retrospectives**, contributing to a 20% improvement in sprint delivery timelines.
- Developed comprehensive test plans, test cases, test scripts, RIA (Release Impact Analysis), RRIA (Release Regression Impact Analysis), and TSR (Test Summary Report) based on business requirements and technical specifications** to ensure complete test coverage.
- Leveraged GitHub Copilot to accelerate automation framework development, streamline test case creation, and enhance code quality through intelligent suggestions and updates.**
- Utilized Microsoft 365 tools to summarize complex requirement documents, generate standardized templates (TSR, Test Plans), and improve collaboration across QA and development teams.**
- Conducted **manual and automated testing across 500+ test cases** for various releases, ensuring a 95% test coverage and identifying critical **defects before** production release.
- Utilized existing **BDD (Behaviour Driven Development) automation framework** to create and validate data in the STLC, which **reduced release regression testing timelines by 2 days.**

- **Managed and executed a regression** and sanity test suite consisting of **350+ automated test cases**, achieving **80%** test coverage across multiple environments, with daily health checks automated using Jenkins.
- **Executed SQL queries to validate backend data integrity**, ensuring that the **data stored in databases** such as MySQL and SQL Server is accurate and consistent with the front-end.
- **Validated batch job input files** (filename, datetime stamp, headers, and data against mapping sheet) and ensured timely completion, performance optimization, and compliance with business requirements.
- Used Red Hat **OpenShift** and **Splunk** to validate logs and services to ensure end-to-end data flow through various microservices.
- **Perform functional, regression, and system testing** to verify that new features and **bug fixes** meet the expected criteria without introducing issues in existing functionality.
- **Identify, document, and track defects using bug tracking tools like JIRA** for test management and reduced defect resolution time by 20%, ensuring that all issues are thoroughly documented in **Confluence**.
- Facilitate **user acceptance testing by working** with business users to ensure the **software meets their needs and expectations**, documenting feedback, and ensuring proper resolution.

Education

Bachelor of Engineering (B.E) – Civil Engineering (Aug 2017 – July 2021)

Dhole Patil College of Engineering (Savitribai Phule Pune University)

Certifications

- Infosys Certified Manual Test Professional
- Infosys Certified Global Database and SQL Professional
- Infosys Certified SDET Test Professional
- Infosys Certified Java SE8
- Infosys Certified Rest Assured Professional
- Infosys Test Data Management
- Infosys Certified Global Agile developer
- AZ-900 Microsoft Azure Fundamentals
- Infosys Certified Professional – Generative AI for ALL
- Infosys Certified Applied Generative AI Professional
